PROFESSIONAL SUMMARY

Trained and hands-on *Cloud Security & DevOps Specialist*. I combine strong *Full Stack* development skills (*React, Node.js, Python, FastAPI*) with modern cloud architecture and cybersecurity. Proficient in building cloud infrastructure using *Terraform*, automating *CI/CD* pipelines (*GitHub Actions*), and leveraging *AI-Assisted Development*. My core strength is a *Secure by Design* mindset, integrating system automation, AWS cloud environment security, and high fault tolerance.

TECHNICAL SKILLS

- **Cloud & DevOps:** *AWS (Cloud Architecture), Terraform (IaC), Docker, CI/CD, GitHub Actions, GitOps.*
- **Security & Testing:** *SIEM (Chronicle), Network Security, Cypress, Jest, Linux (RHEL/Debian/Kali).*
- **Full-Stack & Programming:** *React, Next.js, TypeScript, Node.js, Python, FastAPI, PHP Laravel, Tailwind CSS.*
- **Databases:** *SQL, database design, integrations, and data management.*
- **AI-Assisted Development:** Guiding *AI* agents and *LLM* models, code validation, and architecture management.

WORK EXPERIENCE

- **Intern (Open Source Software Developer) | i4ware SDK Project | 09/2025 – 12/2025**
 - *AI-Assisted Development:* Leveraging *AI* tools in *Enterprise-level SDK* development, code review, and optimization.
 - *Automation:* Streamlining the development team's workflow using *GitHub* and automated deployment processes.
 - *Quality Assurance:* Improving software stability by implementing comprehensive *Jest* unit tests.
- **Career Transition and IT Skill Development | 2021 – Present**
 - Focused career change to the IT sector. Active independent study with a core emphasis on *Full Stack* development, *Cloud Infrastructure*, and *Cybersecurity*.
 - Applying previous industrial process and logistics expertise to modern *Cloud Security* environments and automation.

- **Construction Worker / Carpenter** | *Vanaja Talot Oy* | 11/2012 – 11/2013
 - Diverse assembly and finishing work for residential buildings.
 - Adhering to technical blueprints, independent problem-solving, and team collaboration in dynamic environments.
- **Prefabrication Worker** | *Lujabetoni Oy* | 08/2011 – 12/2011
 - Production line tasks and quality control. Adhering to strict process guidelines under time pressure.
- **Shipping and Receiving Coordinator** | *Lainisalo Oy* | 09/2009 – 10/2011
 - Managing material and information flows and coordinating logistics.
 - Daily use of *ERP* systems and digital shipping documents. High-precision data management and systems proficiency.
- **Prefabrication Worker** | *Lujabetoni Oy* | 07/2007 – 08/2009
 - Industrial prefabrication, mold work, and reinforcement based on blueprints. Monitoring raw material flows and quality assurance.
- **Military Service** | *Finnish Defence Forces* | 07/2006 – 07/2007
 - Developing teamwork skills, discipline, and resilience in a highly organized environment.
- **Construction Worker** | *Rakennuspalvelu Mantila* | 01/2005 – 06/2006
 - Versatile new construction and renovation tasks, including site safety and material management.

EDUCATION & CERTIFICATIONS

- *Part-time Degree in ICT* | *Tredu* | 2024–2026
- *Google Cybersecurity Professional Certificate*
- *Google IT Support Professional Certificate*
- *GitOps & DevOps training* | *Linux Foundation*

KEY PROJECTS

- *Cloud & Full-Stack*: *React*, *Node.js*, and *FastAPI* applications deployed to *AWS* using *IaC* principles.
- *FileConPro*: Cloud-based file conversion utility focusing on performance and accessibility.
- *i4ware SDK*: Maintenance and optimization of an open-source development tool using *AI*-assisted practices.

- *IT Laboratory: Linux*-based testing environment (*UTM*) for network configuration and security tool testing.
