

Joni Haarala

Full Stack Developer & IT / Security Specialist

Phone: +358452306469 | Email: jiihoo86@yahoo.com | Location: Tampere, Finland

GitHub: <https://johadv.github.io/> | LinkedIn: <https://www.linkedin.com/in/johadv/>

PROFILE

A trained and practical software developer with a strong background in Full Stack development, cloud solutions, and **AI-Assisted Development models**. I combine solid coding skills in PHP Laravel, Python, and React with system environment management, enabling me to optimize internal business processes, automate manual workflows, and streamline development pipelines.

Experienced in working alongside AI tools and coding agents, acting as an architect and quality owner to critically review outputs and ensure architectural integrity. I am capable of improving project quality by writing maintainable code, optimizing databases, and ensuring high system reliability.

TECHNICAL SKILLS

- **AI-Assisted Development:** Guiding AI coding agents, Prompt Engineering, LLM Utilization (Claude, Anthropic), Code Review & Validation, Architectural Integrity
- **Full-Stack & SDK Development:** PHP Laravel, Python, React, Node.js, WordPress, JavaScript, HTML5, CSS3
- **Databases:** SQL, Database Design, Integrations, and Data Management
- **Cloud & Deployment:** AWS deployment, cPanel, API Integrations
- **Testing & Methodology:** Jest unit testing, Git, GitHub, Agile Methodologies
- **Infrastructure & Automation:** Terraform, GitOps, Linux RHEL, Debian, Kali

WORK EXPERIENCE

Junior Software Developer (Internship) | i4ware SDK Open Source Project | September 2025 – December 2025 (3 months)

- **AI-Assisted Engineering:** Expanded and optimized an Enterprise-level SDK by working within an AI-assisted development model. Acted as a supervisor for intelligent coding tools, validating AI-generated outputs and ensuring high technical excellence.
- **Efficiency & Automation:** Enhanced the daily productivity of the development team by utilizing Git and GitHub version control alongside streamlined deployment processes, minimizing errors and accelerating feature rollouts.
- **Problem Solving & Quality Assurance:** Improved software stability and architectural integrity by designing clear database structures and executing comprehensive unit tests using Jest before production deployments.

Prior Work Experience | Industrial & Practical Operations | 2007–2012

- Prior to transitioning into tech and pursuing professional retraining in IT, I gained several years of solid work experience in industrial and practical operations. This background established a strong work ethic, adaptability, and the collaboration skills essential for fast-paced team environments.

EDUCATION & CERTIFICATIONS

Part-time Degree in Information and Communication Technology | Tredy | 2024–2026

- Focused on web development, full-stack architectures, cloud deployment, and cybersecurity fundamentals.

In Progress:

- Google IT Support Professional Certificate | Google
- Google Cybersecurity Professional Certificate | Google
- GitOps & DevOps Training Programs | Linux Foundation

KEY PROJECTS

- **i4ware SDK Contributions:** Maintaining a public software development tool and coding new features using modern AI workflows. Source code is directly viewable on my GitHub profile.
- **Full-Stack & Cloud Deployments:** Applications built with React and Node.js, tested with Jest, and deployed to AWS and cPanel environments.
- **Personal IT Laboratory:** Building and managing Linux environments using UTM virtual machines, testing security tools, and configuring network settings.
