PROFILE

Full Stack Developer (Tredu, Vocational Qualification in ICT) who has spent the last six months focusing independent studies on cloud and DevOps skills: AWS, Terraform, Docker, Kubernetes, and networking. I combine hands-on Full Stack development experience (React, Node.js, Python, FastAPI) with growing cloud infrastructure and automation expertise. My goal is to move into a Cloud Engineer / DevOps Engineer role that combines infrastructure as code (IaC), CI/CD automation, and a Secure by Design mindset.

TECHNICAL SKILLS

- **Cloud & DevOps:** AWS (in progress), Terraform (IaC), Docker, Kubernetes (in progress), CI/CD, GitHub Actions, GitOps.
- **Security & Testing:** SIEM (Chronicle), Network Security, Cypress, Jest, Linux RHEL/Debian/Kali.
- **Full-Stack & Programming:** React, Next.js, JavaScript, TypeScript, Node.js, Python, FastAPI, PHP Laravel, Tailwind CSS.
- **Databases:** SQL, database design, integrations, and data management.
- **AI-Assisted Development:** Directing AI agents and LLMs, validating generated code, and managing architecture.

WORK EXPERIENCE

- **Trainee (Open Source Software Developer) | i4ware SDK Project** 09/2025 – 12/2025
 - AI-assisted development: Used an AI-assisted development model to extend and optimize an enterprise-grade SDK development tool. Directed coding agents and reviewed AI-generated code.
 - Automation: Improved the development team's daily efficiency using Git and GitHub version control along with streamlined release processes.
 - Quality assurance: Improved software stability and architectural integrity by designing database structures and implementing comprehensive unit tests with Jest.
- **Career Change and IT Skills Development** 2014 – Present
 - Pursued a deliberate career change into the IT industry. Active independent study focused on Full Stack development, cloud infrastructure, and cybersecurity.
 - Applied prior industrial process and logistics experience to modern cloud security and automation environments.
- **Carpenter / House Builder | Vanaja Talot Oy** 11/2012 – 11/2013
 - Varied construction and finishing work on detached houses and structures.
 - Precise adherence to technical drawings and plans. Independent problem-solving and smooth teamwork in changing conditions.
- **Precast Concrete Worker | Lujabetoni Oy** 08/2011 – 12/2011
 - Production line tasks and quality control. Following process instructions under schedule pressure.
- **Shipping & Receiving Coordinator | Lainisalo Oy** 09/2009 – 10/2011
 - Managed material and information flows and coordinated logistics.
 - Daily use of an ERP system and digital freight documents. Data management and detail-oriented documentation.
- **Precast Concrete Worker | Lujabetoni Oy** 07/2007 – 08/2009
 - Industrial precast element manufacturing, formwork, and reinforcement per drawings. Monitored raw material flow and quality assurance.
- **Military Service | Finnish Defence Forces** 07/2006 – 07/2007
 - Developed teamwork skills, discipline, and resilience under pressure.
- **Construction Worker | Rakennuspalvelu Mantila** 01/2005 – 06/2006
 - New-build and renovation construction tasks. Responsible for workplace safety and materials management.

EDUCATION & CERTIFICATIONS

- **Full Stack Developer, Vocational Qualification in ICT | Tredu | 2024–2026** (graduating 12/2026)

- Further studies in cloud and DevOps skills (AWS, Terraform, Docker, Kubernetes, networking) | Self-study | 2026–
- Google Cybersecurity Professional Certificate
- Google IT Support Professional Certificate

NOTABLE PROJECTS

- **Full-Stack & Cloud:** React, Node.js, and FastAPI applications deployed to AWS using IaC principles (Terraform).
- **FileConPro:** Cloud-based file conversion service focused on performance and accessibility.
- **i4ware SDK:** Maintenance and AI-assisted optimization of an open-source development tool.
- **IT Lab:** Linux-based test environment (UTM) for configuring network settings and testing security tools.
